

## Before styling index.html page

**Required:**

1. Create a file called styleindex.css to format the index.html page and save it to the **Resource/css** folder.
2. Create a file called "mycode.js" and save it to the **Resource/js** folder.

**Evaluation**

**A. HTML [3 marks]**

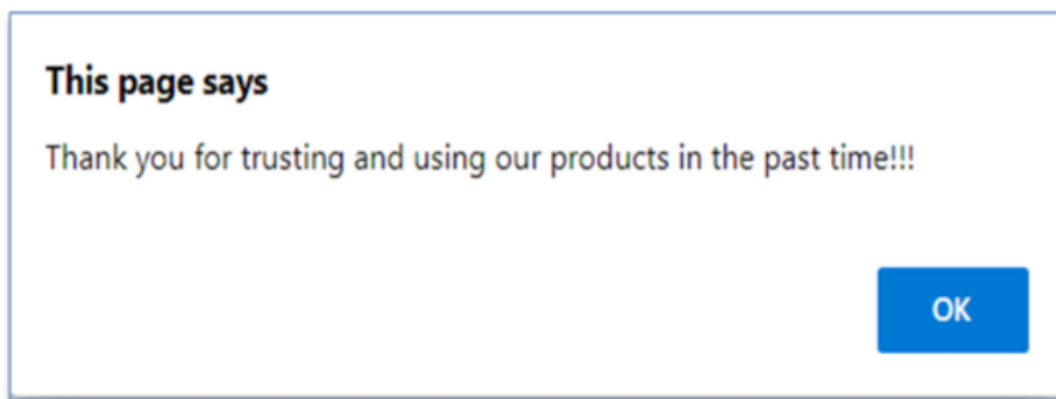

- Embed the styleindex.css file in the head tag of the index.html page [ 0.5 points].
- Embed the mycode.js file at the end body tag of the index.html page [ 0.5 points].
- Use h2, ul and li tags to create a vertical menu as shown above [ 2 points].

**B. CSS [ 6 marks]**

- Use margin and padding to create the right spacing for the contents [1 points].
- Use css to format the logo and horizontal menu as shown above [ 1 points].
- Use color and background to format for the contents [1 points].
- Use width, height to format images as shown above [1 points].
- Use border-radius to corner for div tags [ 1 points].
- Use box-shadow to shade the contents [1 points].

**C. Javascript [1 marks]**

- Create a function with name CustomerInfo to process customer purchase information [ 1 points].
  - o When the user clicks on the  logo, the following dialog box will be displayed:

**The end**

# iPhone 13

- Magic Trackpad 2
- Magic Mouse
- iPhone 13 Pro Max Leather Case  
ITSKINS SPECTRUM SILK

## BEST SELLER

### iPhone 13 pro max

The iPhone 13 Pro and iPhone 13 Pro Max mark the third year in a row that Apple released two Pro models. The phones have the same price as last year's 12 Pro and 12 Pro Max, and are loaded with updated cameras, a larger battery and an A15 Bionic chip. By packing the 13 Pro and 13 Pro Max with features many of us have wanted for years, including a display with a high refresh rate, Apple further defined the difference between its Pro and non-Pro phones. Three years ago, by comparison, the word Pro seemed more of a marketing term than an indication that the phone was any more professional than a regular iPhone.

The 13 Pro is an important signal that there isn't just one iPhone that works for everyone. Unlike last year, both phones now have the same camera array and only vary in terms of size, battery life and price.
